

Hospital Surge Response & DECON Kits

Hospital ER Surge Response Kit

DMS-05350X

The **DMS Hospital ER Surge Response Kit™** was created to expedite and simplify the basic staffing requirements necessary to effectively handle the convergence of patients in the aftermath of a mass-casualty or WMD event upon a fixed medical facility. In addition to the utilization of components found in our popular **DMS-05799 SRS Surge Response System Go-Kit**, additional key position vests and treatment tarps make this kit our most robust surge tool.

This kit addresses some of the unique demands placed on hospital staff when faced with lockdown, decontamination, security, triage, treatment, accountability, and mitigation issues. Fixed medical facilities being unaccustomed to dealing with mass decontamination issues and patient processing, the Hospital ER Response Kit™ will help accomplish these challenges and preserve the facility as a resource to the community.

Contains the Following:

SRS Position Responsibility and Procedure Cards, 3 Storage Clipboards, 10 Standard Clipboards, 5 Triage Unit Leader Patient Count Worksheets, 20 spare Triage Team Initial Triage Patient Count Cards, 6 Treatment Area Manager Accountability Triage Receipt Holders, 5 Transportation Receipt Holders, 5 Casualty Care Unit Leader Count Forms, 50 DMS-05420 All Risk® Wristband Triage Tags, 50 DMS-05525 All Risk® Pediatric Dual Wristband Triage Tags, 10 Pediatric JumpStart/Glasgow Coma Score reference cards.
